Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's amendment filed on December 22, 2003, has been entered and made of record.

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Takaragi et al. (U.S. Patent No. 5,721,628)

Regarding claim 1, Takaragi et al. discloses an image reading apparatus reading an image

Art Unit: 2622

by emitting light from a light source onto a surface of an original, and converting the light reflected from or passed through the surface of the original into an electrical signal, the image reading apparatus comprising:

a color image pick-up device having groups of a pick-up elements corresponding to a plurality of colors, the groups of pick-up elements including a plurality of pick-up element trains which are arranged in parallel to one another on a substrate, the pick-up element train being formed with a plurality of pick-up elements arranged linearly (col. 5, line 18 through col. 6, line 14);

an A/D conversion portion which subjects pixel output data of the color image pick-up device to A/D conversion (col. 5, lines 18-33);

a pixel data storage device which stores the pixel data subjected by the A/D conversion portion to the A/D conversion (col. 5, lines 18-33); and

an averaging device which applies an averaging process to a plurality of adjoining pixel data on each line stored in the pixel data storage device (col. 10, lines 37-45).

Allowable Subject Matter

Claims 2 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 3-7 and 9-13 are dependent on claims 2 and 8 respectively and, therefore, would be allowed.
